

Your Powered Access Specialist

Access Platform Equipment
Rentals, Sales and Training.

Raising standards in Powered Access Rental, Sales & Training

Access Rental Gulf operates across the following countries in the GCC; the United Arab Emirates, the Kingdom of Saudi Arabia, Qatar, and Bahrain.

We have a range of manlifts including scissors and boom lifts from major manufacturers including Skyjack, JLG, and Genie. Offering working heights up to 43 metres you can rest assured we have the right machine for your job.

We offer IPAF training, as the industry's leading training authority in the safe use of manlifts, details of which can be found on page 8, ensuring you and your workforce are trained is key to working safely and productively at height.

If you are looking to purchase a machine, our experienced equipment sales team, ARG Resale are on hand to advise you.

Access Rental
Gulf boasts one
of the most
experienced
teams in the
Middle East.

Our Services

Rental

From a range of machines with working heights of up to 43 metres, we can provide the right solution. Our range of machines include:

- Telescopic booms
- Articulating booms
- Scissor lifts

For more information about safe working loads and working height etc, please refer to our Rental Fleet section on pages 13-22, detailing the range of machines available for hire.

Sales

If you are looking to buy a new or used access platform, our equipment sales division, ARG Resale, will be happy to provide advice.

ARG Resale has an extensive range of ex-rental machines available, together with a selection of new equipment from Skyjack available for immediate delivery.

At ARG Resale our dedicated team of experts have the resources, knowledge and experience to help meet your exact requirements.

Training

We have IPAF Training Centres in the UAE and Saudi Arabia, supported by one of the most experienced and knowledgeable Powered Access training teams in the Middle East. Our training enables your workers to gain the right skills for working at height safely and effectively.

To book training please contact your nearest depot (see Our Depots for more information).

Our machines are suitable for a wide range of applications:

- | | |
|-----------------------|-------------------------|
| Construction building | Electrical installation |
| MEP work | Building maintenance |
| Fire protection | Warehousing |
| Inspection | Cleaning |
| Dock work | HVAC installation |
| Steel work | Cladding |
| Painting | Events management |

ARG

RESALE

New & Used machines in stock for immediate delivery

When it comes to buying a machine, our team of dedicated experts is here to support you.

Used Machines

With a fleet of almost 1,000 machines in Middle East, you're bound to discover the perfect match as per your requirement. These machines are meticulously serviced and maintained, ensuring top-notch performance.

- PDI (pre-delivery inspection)
- 30 day warranty as standard (excluding batteries)
- Service & Maintenance Agreements are available to purchase

Export & Shipping

We export machines to all corners of the globe. We have established relationships with shipping agents and can offer advice about shipping your access platform.

New Machines

Choose any new machine to suit your needs from any of the major manufacturers.

- Manufacturer's warranty (excluding batteries)
- Latest machine features
- PDI (pre-delivery inspection)
- Discounts on our training courses and Service & Maintenance Agreements

Outright Purchase

An outright purchase is the quickest and most cost effective way to purchase your new machine.

IPAF Training in UAE

[View Available Courses](#)

Access Rental Gulf offers IPAF Training courses for powered access operators, IPAF Operator training is accredited to the ISO 18878 training standard. IPAF (International Powered Access Federation) is an internationally recognised standard for training on Powered Access equipment with over 850,000 licensed operators worldwide.

IPAF Operator 3a 3b

This 1-3-day course instructs an operator to prepare and safely operate various Manlifts and MEWPs, including scissor lifts and boom lifts. A mix of theory and practical training, this course is designed to enable operators to manoeuvre, drive and position the MEWPs safely and proficiently. Courses can be undertaken on scissor lifts, boom lifts, trailer mounted or truck-mounted platforms.

[Book now](#)

IPAF Operator 3a

The Mobile Vertical 3a scissor lift and personnel platform operator course is a one-day training program that teaches operators how to prepare and safely operate these machines. The course is a combination of theoretical and practical training, designed to equip operators with the necessary skills to manoeuvre, drive, and position the MEWPs (Mobile Elevating Work Platforms) safely and effectively.

[Book now](#)

IPAF Operator 3b

The Mobile Boom 3b Self-propelled boom operator course covers both theoretical and practical aspects, providing operators with the necessary skills to operate and position the MEWPs (Mobile Elevating Work Platforms) safely and efficiently. The course is suitable for operators of various types of MEWPs, boom lifts, trailer-mounted, and truck-mounted platforms.

[Book now](#)

IPAF Operator 1b

This course instructs an operator to prepare and safely operate Static Boom 1b self-propelled booms. Operators will need to bring their own harness in order to complete 1b training.

[Book now](#)

IPAF Demonstrator

This training course is designed for individuals who need to showcase their proficiency in operating and ensuring the safety of a Mobile Elevating Work Platform (MEWP) to a trained operator. The program covers the same machine categories as the operator training program and is aimed at satisfying the high-demand requirements of the industry.

Powered Access Provider for Oil and Gas Industry

**Safe and Efficient Working at
Height Solutions.**

We provide MEWPs for the Oil and Gas sector

When it comes to oil and gas sector projects, it is important to have a dependable heavy equipment rental company you can trust. All our equipments are well-maintained and thoroughly inspected according to oil and gas requirements, so our customers face no issues on such sensitive sites. Enabling safe access is our company mantra - at Access Rental Gulf, we have been striving to improve safety in all aspects of our work, from our Sanctuary Zone development to our award-winning familiarisation videos. We always put safety first; our oil and gas sector support is no different. We conduct site surveys to ensure the best possible fit of our machines to your site and will tailor to your requirements accordingly.

All of this ensures that our machines strictly adhere to legal safety requirements for working in the oil and gas industry, and all our machines are from reputable brands, such as JLG, Skyjack, and Genie (to name a few).

- Chalwyn Valve
- Spark arrester
- Fire Extinguisher
- Spill Kit
- Third Party Certificate (TUV OR ABB)
- Good Tires
- Sky Guard
- Warning Stickers
- Conformity Certificate from Manufacturer
- Service History - if the machine above 3-year old

All of this ensures that our machines strictly adhere to legal safety requirement for working in the oil and gas industry, and all our machines are from reputable brands, such as JLG, Skyjack and Genie (to name a few).

We also offer excellent IPAF training through our training division.

Checklist for using Access Platforms

1 Working height

The machine reach heights in this brochure relate to the measurement from ground level to the maximum platform height, plus an extra two metres.

2 Required outreach

Outreach relates to the measurement from the centre of the turret plus an extra 5cm on a fully extended boom.

3 Carrying weight

Always check the safe working load (SWL) of the machine before operating. Calculate the weight of the operator (an average male is 85kg) plus tools and compare the total to the machine's SWL.

4 Wind speed

Working in unsafe wind conditions is dangerous. Always refer to the machine operator's manual for the maximum safe wind speed and double check by using an anemometer.

5 Ground conditions

The condition of the ground can make a huge difference to the performance of the machine. For example working on a gradient, wet or rough terrain will affect a choice of equipment. We recommend that you discuss this with your Hire Desk Controller or Sales Manager.

6 Working indoors

When working indoors we recommend electric powered machines. Remember to measure any doors which the machine may need to pass through and also let us know if you are working on a surface where you will need non-marking tyres or wheel covers.

7 Which operator

All of our machines can be self operated. If your operator does not hold a recognised license then contact us about training (see pages 7-10 for more information about IPAF training).

8 Working outdoors

Diesel powered machines are mainly used outdoors. All machines used outdoors should have a wind rating. Also consider the outreach needed and ground conditions.

9 Machine operator's manual

Finally before operating any machine, always remember to read through the machine operator's manual

ARG Familiarisation Video Guides

Including emergency lowering procedure videos, enabling you to get down quickly in an emergency.

Quick reference Video Guides

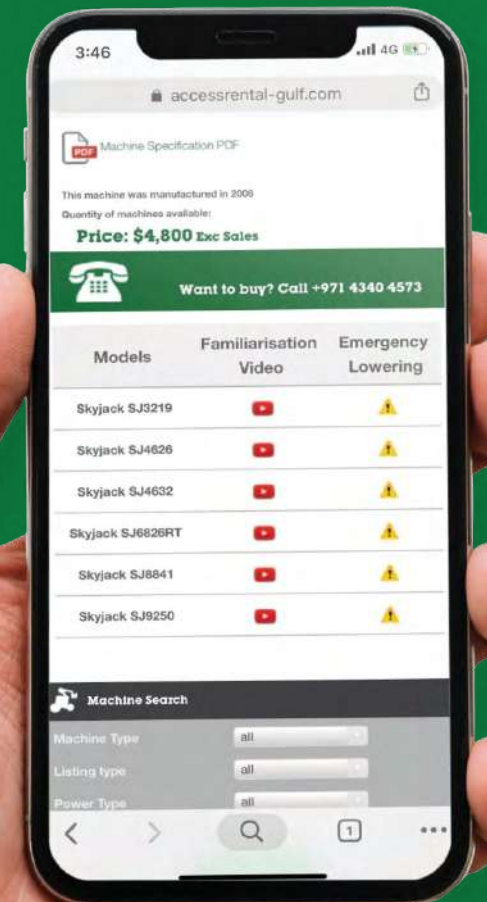

A key contributory factor to MEWP accidents, incidents and fatalities is lack of operator familiarisation regarding the specific machine they are operating and a lack of knowledge about the emergency rescue procedures. Our familiarisation videos give operators the knowledge they need and our emergency lowering videos can provide personnel on the ground with the knowledge they need in an emergency.

Visit our website www.accessrental-gulf.com to view our Familiarisation and Emergency Lowering Videos

Our videos cover:

- ✓ Pre-use inspection
- ✓ Control function overview
- ✓ Safety device summary
- ✓ Emergency procedures
- ✓ Machine documentation

Experience our revolutionary Familiarisation Video Guides for a new level of on-site safety.
